
Nancy Fugosich-Cheng – Director of Administration, C&A Consulting LLC

Background: Nancy Fugosich-Cheng is a co-founder and Director of Administration for C&A Consulting LLC. Accounting, Banking, and Human Resources functions report to her. She is the firm's coordinator with outside parties to comply with records accuracy/retention, labor, insurance, employee benefits, payroll and tax issues that support the day to day workings of C&A Consulting LLC.

Industry Knowledge:

Nancy's career has been broad and varied. Armed with an MBA in Finance and an undergrad degree in Computer Science and Accounting, Nancy began her career in technology and eventually managed various teams of systems developers at Verizon (formally NYNEX), running one of the largest transaction processing data warehouses. Her team provided part of the root technology structure that was spun off to each of the Baby Bells when the AT&T divestiture occurred. Her skills include network engineering, management, and application development and implementation.

Nancy followed her success in technology with a change in focus to teaching, coaching and public advocacy. Her work concentrated on the selection and implementation of new academic pilot programs for regular, gifted and special needs students in the public education space. Nancy gained a broad knowledge of the diverse administrative requirements, state mandates, stakeholder needs and budget complexities facing public education with each new program she helped to implement. Nancy left public advocacy to co-found C&A Consulting LLC.

Notable Accomplishments:

- Helped to fund and implement a Career Exposure Technology Program for public middle schools. Some of the Technology Stations initially chosen supported Pilot Aviation, Police Crime Forensics, Architecture, Small Robotic Devices, and more.
- Helped to establish Character Education/Awareness Training and Social Skills Training across all grades and all student populations in public school districts, K-12.
- AT&T Divestiture – Directed team application development efforts to establish Data Warehouses that supported/controlled divested telephone companies' software applications, post monopoly in the New York State area.
- E911 – Helping to establish the standardized address data warehouse used to implement the rollout of emergency 911 services across New York State.

Experience:

- Montville Educational Foundation, Board of Trustees
- The Brenner Securities Group, Network Engineer
- Verizon, (formerly NYNEX) Associate Director, Applications Development

Education:

- MBA – Finance (Magna Cum Laude), Stern Business School – New York University (New York, NY)
- BA – Computer Science & Accounting (Summa Cum Laude), Queens College – CUNY, NY
