
Ms. Jody Angelini – Director, CyberSecurity & Technology Management, C&A Consulting LLC

Background: Jody Angelini has over 40 years of experience in technology management and consulting, with Clarus Consulting LLC, Clearing House Payments, Pennsylvania Higher Education Assistance Agency, Commonwealth of Pennsylvania; Office of Administration, Office of Budget, and Dept. of Revenue, as well as the PA Air National Guard. She brings a holistic, integrated approach to implementing and solving clients' information technology (IT), security infrastructure and business requirements that align with the organization's strategic business and IT objectives. Ms. Angelini has direct line management experience of supervising Technology and Information Security (InfoSec) teams.

Industry Knowledge: Ms. Angelini is a seasoned practitioner in the design and execution of Information Technology, InfoSec, Compliance, Governance, Risk methodologies and frameworks. Ms. Angelini reviews and assesses the IT and security needs of client organizations, identifies gaps, and provides solutions to close identified gaps and to meet organizational business and audit requirements.

Throughout her career, Ms. Angelini has built IT and InfoSec offices from the ground up. She served as Chief Security Officer/VP at PHEAA and as VP of Network Technology and Client Support Services with direct report to the CIO/SVP. She has worked directly with C-level management to ensure IT and InfoSec aligned with the organization's strategic objectives.

Ms. Angelini provides technology leadership and management of IT/IS operations, policy and planning. She leverages strong subject matter expertise to provide consultancy services to senior and executive management in the financial services sector. She is a Certified Information Systems Auditor (CISA) and Certified Information Security Manager (CISM).

Notable Accomplishments:

- Established and managed the first Enterprise Information Security program and pro-actively crafted key elements to meet client requirements and projected government regulations to safeguard the agency's \$84.4B in assets, intellectual property and computer systems, as well as physical safety of employees and visitors.
- Established and managed a client server environment for an agency to include Windows Servers, Unix (AIX, SUSE, RedHat), Telecom (Call Management, Predictive Dialler, PBX, IVR, etc.) TCP/IP Transmissions, Network (Routers, Switches, IDS/IPS, Firewalls, etc.), Imaging, and Workstations (PCs/Laptops).
- Established Enterprise Business Continuity and Disaster Recovery governance across the organization, consistent with industry best practices, regulatory requirements, and compliance with agency third-party contracts. Developed, implemented and managed offsite disaster & business recovery plans (DRP/BCP) for all four locations.
- Conducted several third-party security and privacy assessments; all clients received their Authority to Operate.
